DETAILED ACTION

1. This action is in response to an amendment filed November 30, 2006. claims 1 and 24 have been amended. Claims 1-36 are pending.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham v. John Deere Co., 148 USPQ 459*, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or unobviousness.
- 4. Claims 1- 9, 11-13, 19, 20, 24, 25, and 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Logsdon in view of Geary. Logsdon (Figure 4) discloses the claimed invention except for the recitation of the removable (i.e., tighten to form a seal and untighten to remove) valve inserts 30, 34 and test cap 30, 34 for the respective valve and drain inlets of Logsdon as taught by Figure 4 of Geary. Respective coacting notch and ramp tab structure is clearly shown in Figure 4 of Geary. The three openings 28 of Logsdon are shown in the bottom of the valve box. (claim 12) It would have been obvious to one having ordinary skill in the art at

Application/Control Number: 10/768,544

Art Unit: 3753

the time the invention was made to modify the washing machine outlet box inserts and test cap of Logsdon as taught by Geary such that the inserts and test cap is removable as taught by Geary to improve the ease of assembly and disassembly of the washing machine outlet box. Applicant's remarks were considered, however, not deemed persuasive. By providing removable inserts as taught by Geary would improves the ease of assembly and disassembly of the box. Locking disclosure for insert 50 and test cap 52 include locking station 58 which includes a further disclosure of "tightening" and "untightening" to allow insertion and removal. Notch and tab recitation is readable on the disclosure of column 4, lines 37+ of Geary. Since a test cap is disclosed it provides a seal as recited in claim 4. with regard to claim 20, a "snap lock' connection is shown in Figure 4A of Geary.

Page 3

5. Claims 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Logsdon in view of Geary further in view of Figure 3 of Kopp et al. It further would have been obvious to one off ordinary skill in the art to make the inserts of Logsdon modified in view of Geary on a common "flange" valve assembly as taught by Kopp et al in order to allow ease of assembly. Contrary to applicant's remarks the patent to Kopp et clearly shows the particular hot and cold water shut off valve disposition (Figure 1).

Allowable Subject Matter

6. Claim 10, 14-19, 21-23 and 34-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3753

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Michael Chambers whose telephone number is 571-272-4908. The examiner can normally be reached on Mon-Thur. 6:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Keasel can be reached on 571-272-4929. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
